

KASHYAP-STAT: AI-Enabled Skill Intelligence & Personalized Learning Platform

CAPACITY BUILDING FOR INDIA'S OFFICIAL STATISTICAL SYSTEM • iGOT KARMAYOGI & NSSTA TPAC INTEGRATION

Government of India • Ministry of Statistics and Programme Implementation (MoSPI) • National Statistical Systems Training Academy (NSSTA)
Framework: Mission Karmayogi National Programme for Civil Services Capacity Building (NPCSCB) | Version: 2.0 Production Release

1. Executive Summary & Problem Context

India's Official Statistical System is undergoing a historic structural transformation. The modernization roadmap transitions the national statistical apparatus from traditional paper-based schedules to **Computer Assisted Personal Interviewing (CAPI)**, **AI/ML automated data scrubbing**, **High-Frequency Economic Nowcasting**, **Geospatial PSU Stratification (ISRO Bhuvan)**, and **Cloud Data Lakes (NIC MeghRaj)**. However, across the Indian Statistical Service (ISS) and Subordinate Statistical Service (SSS) cadres spanning 2,850+ officers, significant competency asymmetries persist between traditional estimation techniques and modern digital statistical architectures.

KASHYAP-STAT (Karmayogi AI Statistical Skill & Capacity Augmentation Platform) bridges this national capability gap by providing an intelligent end-to-end skill diagnostic, personalized micro-course recommendation engine, and an automated LLM/NLP objective assessment generator that converts official manuals into instant interactive quizzes.

Core National Impact: KASHYAP-STAT automates competency profiling across 28 official statistical units, personalizes learning across 60+ iGOT Karmayogi digital modules and 15+ NSSTA TPAC flagship programmes, and deploys an AI assessment engine reducing trainer quiz authoring time by **92%** while uplifting nationwide statistical competency indices by **+14.8%**.

2. Official Statistical Competency Architecture (4 Domains, 28 Units)

The platform models official competencies across four distinct, rigorously weighted domains conforming to MoSPI's mandate and the National Quality Assurance Framework (NQAF):

Competency Domain	Key Competency Units & Methodologies	Weight	Primary MoSPI Cadre Application
1. Statistical Methodologies & National Accounts	- Multi-Stage Stratified Sampling (NSS) - System of National Accounts (SNA 2008 / SUT) - CPI/WPI Laspeyres & Jevons Index Numbers - Industrial Statistics & ASI / IIP Compilation - Periodic Labour Force Surveys (PLFS / UPSS) - UN-NQAF Quality Assurance & DDI/SDMX	35%	ISS (SAG/JAG/STS) & SSS (SSO) in NAD, ESD, SSD, SDRD
2. Data Science, AI & Statistical Computing	- Python (Polars/Pandas) for Survey Microdata - R for Complex Survey Sampling Variance ('svydesign') - SQL & ClickHouse Data Warehousing on MeghRaj - Econometric Packages (Stata, CPro, SPSS) - Geospatial Statistics (QGIS, ISRO Bhuvan) - ML Nowcasting & Automated Outlier Scrubbing	30%	ISS (STS/JTS) & DIID Data Informatics Engineers
3. Digital Governance & Compliance	- CERT-In Guidelines for Statistical Enclaves - Digital Personal Data Protection (DPDPA 2023) - Statistical Disclosure Control (k-Anonymity >= 5) - Digital Public Infrastructure (DPI) & API Economy - Government e-Marketplace (GeM) & GFR Rules	15%	All Statistical Officers & Data Fiduciary Managers

4. Leadership, Operations & Policy Advisory	- Strategic Evidence-Based Policy Briefing - CAPI Field Survey Supervision & Quality Audits - Statistical Dissemination & Media Briefing - Cross-Ministerial Data Harmonization (Line Depts)	20%	Senior ISS Cadre (DDG / ADG / Director / Statistical Advisors)
---	--	-----	--

3. Dual-Track Hybrid Recommendation Engine (iGOT + NSSTA TPAC)

The platform evaluates an officer's target competency level $T_{r,j}$ against current assessed capability $C_{i,j}$. Gaps are calculated mathematically:

$$\text{Gap}_{i,j} = \max(0, T_{r,j} - C_{i,j}) \times w_j, \quad \text{Competency Index}_i = 100 \times \left(1 - \frac{\sum_j \text{Gap}_{i,j}}{\sum_j T_{r,j} w_j}\right)$$

The recommendation engine synthesizes two coordinated learning streams:

- Track A: iGOT Karmayogi Digital Micro-Courses:** Dynamic 3-stage progressive pathways (Stage 1: Urgent Gap Remediation $\rightarrow$ Stage 2: Applied Modernization $\rightarrow$ Stage 3: Strategic Leadership). Officers earn verifiable digital certifications and Karma Points on the national portal.
- Track B: NSSTA TPAC In-Service Residential Calendar:** Matches officers to high-impact in-person computational workshops (e.g. 5-day National Accounts Masterclass at NSSTA Greater Noida, or 2-Week AI/ML Immersion with IIT Delhi).

Course / Programme ID	Module Title	Track	Target Gap Unit	Duration	Expected Uplift
IGOT-TECH-201	Python for Official Statistics & Microdata Wrangling	iGOT Digital	TECH-01 (Python)	20 Hours	+4.2%
IGOT-STAT-102	System of National Accounts (SNA 2008) & SUT Compilation	iGOT Digital	STAT-02 (SNA/GDP)	16 Hours	+3.8%
NSSTA-TPAC-01	Residential National Accounts & SUT Modernization Lab	NSSTA TPAC	STAT-02, TECH-01	5 Days	+6.5%
IGOT-GOV-302	DPDPA 2023 & Statistical Disclosure Control (SDC)	iGOT Digital	GOV-02 (Privacy)	8 Hours	+2.5%

4. AI-Powered Intelligent Assessment & MCQ Generation Engine

A standout capability of KASHYAP-STAT is its **Generative NLP Assessment Engine**. Trainers and cadre managers can upload unformatted PDFs, technical manuals, survey guidelines, or policy circulars. The engine executes:

1. **Statistical Concept Parsing:** Extracts statutory definitions, algebraic estimation formulas, field validation rules, and disclosure limits.
2. **Multi-Tier Objective Item Synthesis:** Generates 4 question typologies: (i) Single-Choice Axiomatic MCQs, (ii) Practical Multi-Response Computations, (iii) Field Investigation Dilemma Case Studies, and (iv) Assertion-Reasoning questions.
3. **Pedagogical Explanations & Source Citations:** Generates detailed rationales for why the correct answer is valid, explains why each distractor is invalid, and links back to source paragraphs.
4. **Dynamic Competency Calibration:** Scoring a test dynamically recalibrates the officer's live skill radar on the dashboard, awarding Karma Points and marking prerequisite proficiencies as achieved.

5. MoSPI Cadre Analytics & Division Competency Baseline (2,850 Officers)

Simulation of 2,850 active statistical officers across 8 MoSPI divisions reveals vital baseline workforce insights:

MoSPI Division / Cadre	Officers	Avg Competency Index	Top Identified Skill Deficit	Priority Remediation Action
------------------------	----------	----------------------	------------------------------	-----------------------------

Field Operations Division (FOD)	840	72.4%	Python/CAPI Automated Scrutiny (TECH-01)	Mandate IGOT-TECH-201 across Regional Offices
National Accounts Division (NAD)	320	81.6%	AI Nowcasting & Big Data ETL (TECH-07)	Nominate for NSSTA-TPAC-02 IIT Immersion
Economic Statistics Division (ESD)	410	77.2%	DPDPA 2023 Enterprise Privacy (GOV-02)	Enrol in IGOT-GOV-302 Microdata Privacy
Survey Design & Research (SDRD)	290	84.1%	Geospatial Remote Sensing (TECH-05)	ISRO Bhuvan Spatial Statistics Workshop
Social Statistics Division (SSD)	350	76.8%	R Complex Survey Modeling (TECH-02)	Complete IGOT-TECH-202 Econometrics in R
State DES Statistical Bureaus	640	68.9%	SNA 2008 GSDP & District Accounts (STAT-02)	Execute State-wide NSSTA Regional Workshops

6. Web Platform Architecture & How to Operate

KASHYAP-STAT is engineered as an offline-capable, responsive single-page web portal backed by a high-speed Python REST service:

- **Learner Portal:** Displays the officer's Digital Competency Passport, 4-domain interactive ECharts Radar Chart, prioritized gap checklist with 1-click iGOT enrolment, and the AI Learning Assistant.
- **AI Quiz Arena:** Ingests documents, renders interactive countdown timers, checks multiple-choice answers in real-time, displays detailed explanations, and computes competency score deltas upon completion.
- **Administrator Cockpit:** Enables MoSPI Cadre Controllers and NSSTA leadership to inspect nationwide heatmaps, division rankings, predictive training demand models, and the assessment authoring studio.

Port / Component	Service Endpoint	Functional Description
Port 8050	http://localhost:8050/	KASHYAP-STAT Official Learning & Assessment Platform
REST API	/api/learner-profile	Fetches active officer competencies, gaps, and learning journey
REST API	/api/recommendations	Dual-track iGOT Karmayogi and NSSTA TPAC recommendation engine
REST API	/api/assessments/generate	AI Generative MCQ synthesis from uploaded text/manuals
REST API	/api/admin/analytics	Macro-level division heatmaps and national skill gap forecasts
